

## **ALTO DE SÃO BENTO MUSEUM CENTRE**

Situated in an area of exceptional diversity at the level of natural and cultural heritage, the Alto de São Bento Museum Centre was created to promote the playful-pedagogical component of the natural sciences, paying special attention to geology and Floristics.

This Centre offers the general community, more specifically the educational community, observation and experimentation activities in the field of natural sciences, history and heritage, environment and citizenship and artistic expression activities, promoting a privileged encounter between nature, art and culture.

In the adjacent area you can also visit a thematic route starting at the mills.
